

Gold Standard

Case	Rank
1.	<ol style="list-style-type: none"> 1. T3.1 Diabetes mellitus 2. L3.1.1 Insulin/insulinanaloger
2.	<ol style="list-style-type: none"> 1. T10.2 Obstruktiv lungesykdom 2. T10.2.2 Kronisk obstruktiv lungesykdom (kols) er det mest
sentrale 3.	<ol style="list-style-type: none"> 1. T1.10 Alvorlig bakteriell meningitt 4. 1. T8.3 Koronarsykdom 2. T8.3.2 Ustabil koronarsykdom 3. T8.3.1 Stabil koronarsykdom
5. (There are no really relevant pharmaceutical treatments for colorectal cancers, - but potential related symptoms...)	<ol style="list-style-type: none"> 1. T2.2.1.1 Kolorektalcancer 2. T4.1 Anemier 3. T4.1.1 Jernmangelanemi
6.	<ol style="list-style-type: none"> 1. T11.3.2 Tonsilitt 2. T11.3.2.1 Akutt tonsilitt 3. T11.3.2.2. Kronisk tonsilitt 4. T1.3 Mononukleose
7.	<ol style="list-style-type: none"> 1. T21 Palliativ behandling 2. T21.1.1 Smerter 3. T21.1.1.1 Nociceptive smerter 4. L20.1.2.3 Sterkere opioidagonister/-antagonister
8.	<ol style="list-style-type: none"> 1. T11.3.2 Tonsilitt 2. T11.3.2.1 Akutt tonsilitt 3. T11.3.2.2. Kronisk tonsilitt 4. T1.3 Mononukleose

Notice that the rank contains both general and more specific underlying chapters and that is intended. Furthermore that some conditions do NOT have a proper pharmaceutical treatment, so the matching is of course superficial.
